

LET'S DISCOVER THE RENEWABLE ENERGIES

AN ENERGY IS "RENEWABLE" IF IT COMES FROM A SOURCE THAT IS CONSTANTLY REPLENISHED.

THERE ARE FIVE SOURCES OF RENEWABLE ENERGIES THAT USE THE STRENGTH OF THE NATURAL ELEMENTS OF EARTH.

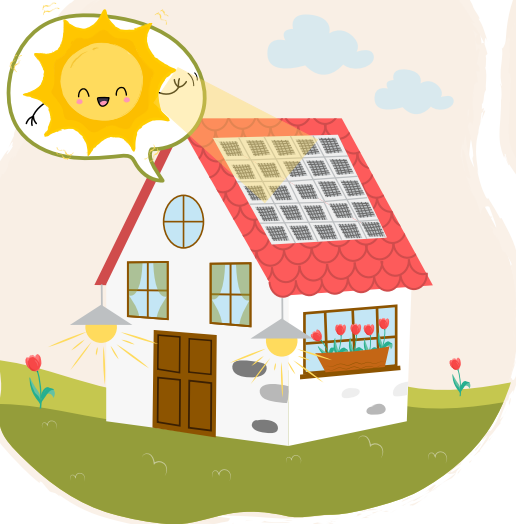

HYDROPOWER USES THE STRENGTH OF WATER, THE RIVERS AND TIDAL CURRENT AS WELL AS THE STRENGTH OF WAVES.

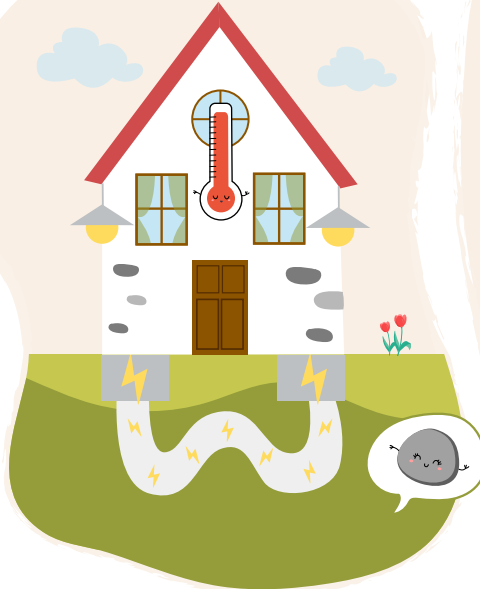

WIND TURBINES TURN THE WIND INTO POWER DUE TO THEIR LARGE PROPELLERS.

SOLAR ENERGY CATCHES SUN'S RAYS AND ITS HEAT THROUGH PANELS.

GEOTHERMAL ENERGY USES UNDERGROUND AND ROCKS HEAT TO WARM OUR HOMES.

BIOMASS COMES FROM THE METHANATION OF ORGANIC MATTER.

IT ALLOWS TO CREATE POWER, HEAT AND FUEL.

ALL THESE ENERGIES ARE VERY CLEAN AND INEXHAUSTIBLE !
