

HOW TO SAVE THE BEES?

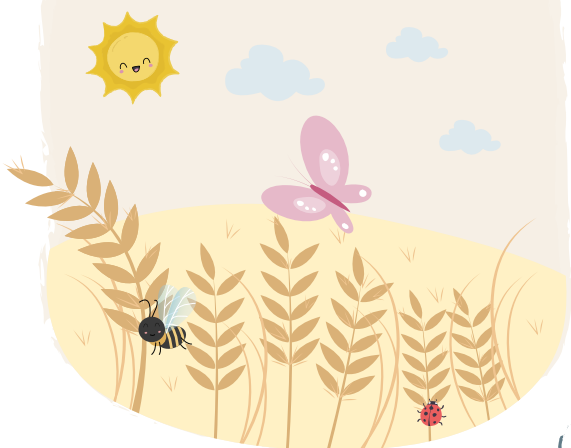

BEES HELP PLANTS TO REPRODUCE
THEY ARE INSECT POLLINATORS.

THEY GATHER NECTAR TO FEED THEMSELVES
BY CARRYING IT FROM FLOWER TO FLOWER AND MAKE HONEY.

80% OF THE WORLD'S CROPS
DEPEND ON BEES, BUTTERFLIES,
BUMBLEBEES, ANTS AND LADYBIRDS...

BUT THE USE OF PESTICIDES PUT THEM IN DANGER !
THEY CAN'T FIND THEIR WAY BACK HOME,
LOSE THEIR HIVE AND SOMETIMES DIE.

BUT HOW TO ACT
TO SAVE THEM?

1 BY EATING LOCALLY
PRODUCED HONEY (YOU CAN CHECK
THIS INFORMATION ON THE JAR).

2 BY GROWING PESTICIDE
FREE PLANTS IN YOUR
GARDEN OR ON YOUR BALCONY.
